

GERARD KELLY

MD MEd FRCS(Ed) FRCS(ORL-HNS)

CONSULTANT ENT SURGEON

CURRICULUM VITAE

PERSONAL DETAILS

Name Gerard Kelly
Date of birth 18th July 1967
E mail addresses Gerard.Kelly3@nhs.net or Email@GKelly.co.uk
Hospital Address Department of Otolaryngology, The General Infirmary at Leeds, Great George Street, Leeds, West Yorkshire, LS1 3EX
Telephone Number 0113 392 8037
Nationality British
GMC number 3470303
MDDUS number M 11 50 42

QUALIFICATIONS

2007 (December) MEd (University of Leeds)
2002 (July) MD (University of Edinburgh)
1999 (November) FRCS (ORL-HNS)
1996 (January) FRCS (Otolaryngology, Edinburgh)
1994 (June) FRCS (Surgery in General, Edinburgh)
1990 (June) MB ChB (University of Glasgow)

PRESENT APPOINTMENT (from December 2001)

Consultant ENT surgeon, The Leeds teaching hospitals NHS trust and honorary senior lecturer in Otolaryngology, the University of Leeds (from Dec 2001). Former Clinical Director of the Leeds ENT Department. Former Otology Section editor for the e-Learning Department of Health / ENT UK Project and former Otology Section for the ENT UK e-Learning Project. Former editor of the ENT UK Newsletter. Past member of the panel of question writers, the Intercollegiate Specialty Board in Otolaryngology. Appraisal lead for the Head & Neck CSU in Leeds Teaching Hospitals.

CLINICAL EXPERIENCE

Otology, Neuro-otology and Endoscopic Sinus Surgery

My specialist interest is in complex otology and neuro-otology. I run a major, north of England acoustic neuroma service and a nationally funded neurofibromatosis clinic.

EDUCATION

2004 - 2007

MEd, the University of Leeds, with merit

1997 - 2001

MD, the University of Edinburgh

1985 - 1990

Faculty of Medicine, the University of Glasgow. Student chairman of the Medical Faculty Staff Student Committee

1979 - 1985

St. Mirin's and St. Margaret's High School, Paisley. Boys Depute Senior Captain

POSTGRADUATE AWARDS

1. Best presentation award, Mackenzie ENT Society (December 2008)
2. Visiting Professor, University Health Network, Toronto, Canada, June 2001
3. RSM scholarship to attend and present at the 5th European Skull Base Society Congress, Copenhagen, June 2001
4. Ethicon Fellowship to attend the Dundee Open Structure Rhinoplasty course, September 2000
5. Llewellyn Bevan Prize, May 2000, 'The Role of Electronic Implants in the Management of Hearing Loss'
6. Exmoor Plastics prize, Short papers, Section of Otology, The Royal Society of Medicine. March 2000. 'Myringoplasty: Does size matter?'
7. Guthrie Fellowship to attend BACO, 1999. Awarded for the best presentations to be presented at the meeting by Scottish registrars
8. Best Paper Award, The Scottish Otolaryngological Society Summer Meeting, June 1998. 'An animal model for electrophysiological assessment of the facial nerve'
9. Scotia Fellowship to St Bartholomew's Hospital, London, January - March 1998
10. JS Fraser Prize, Edinburgh, June 1996. 'Is Otolaryngology Evidence Based?'
11. Best Paper Award, West of Scotland ENT Registrar's night, May 1995. 'The incidence of possible conjunctival contamination in tonsillectomy'

UNDERGRADUATE AWARDS

Prizes

Glasgow Finalist, Cappell Award, a national university award for original research in Pathology (1989)
University of Western Ontario Award Scholar (1989)

Distinctions

Community Medicine (1988), Biology, Chemistry (1985)

Certificates of Merit

Paediatric Surgery, Clinical Medicine, Clinical Obstetrics (1990), Clinical Surgery (1989), Clinical Medicine (1988), Biochemistry (1987)

ELECTIVES

July 1988

General Surgery with Dr MR Dover, Ottawa Civic Hospital, Ontario, Canada.

July - September 1989

Six weeks in Plastic Surgery with Dr. RG Colcieugh and four weeks in General Surgery with Dr W Jamieson in the Victoria Hospital, London, Ontario, Canada, as the University of Western Ontario Award Scholar.

PREVIOUS OTOLARYNGOLOGY APPOINTMENTS

January 2001 - December 2001 (1 year)

Fellow in neuro-otology and skull base surgery, Manchester Royal Infirmary

November 1995 - January 2001 (5 years 2 months)

Registrar in Otolaryngology, Edinburgh

August 1994 - October 1995 (1 year 2 months)

Senior House Officer III in Otolaryngology, Glasgow Royal Infirmary

NON-NHS APPOINTMENTS

Otology Section Editor for the ENT UK e-Learning Project (until 2015)

Editor of the ENT-UK newsletter (from May 2008-2013)

Deputy Editor of the ENT-UK Newsletter (from May 2007 until May 2008)

SOCIETY AND COMMITTEE MEMBERSHIPS

Faculty member of Bradford Part III Revision Course FRCS ORLHNS (2005 - 2009)

Member of the panel of question writers for the Intercollegiate Otolaryngology Examination (2005 - 2012)

Member of the medical student admissions interview panel, University of Leeds (2003 - present)

Member of the Otolaryngology Specialist Training Committee, Yorkshire (2002 - 2010)

Secretary of the North of England Otolaryngology Society (2002 - 2006)

Secretary of the Mackenzie ENT Society (2013-present)

Member of the Specialist Advisory Board in Otolaryngology, The Royal College of Surgeons of Edinburgh. (2000 - 2001)

ENT UK (2002 - present)

Manager of the North of England Otolaryngology Society Internet worldwide web site. (2001 - 2007)

ENT representative of 'Vision 2000', the committee that is establishing a new medical student curriculum for the University of Edinburgh (1997 - 1999)

Oto-rhinolaryngological Research Society (1997 - present)

Student representative on the Medical Faculty Staff Student Committee (1985 - 1990)

Member of the Mackenzie ENT Society (2006 - present)

TEACHING AND TRAINING

I am actively involved in training nurses, medical students and surgical trainees, as well as being involved in the in-training assessment of registrars and senior house officer grade doctors. I am a clinical and educational supervisor to trainee ENT surgeons. I have been involved in training courses including the Edinburgh Middle Ear Surgery Course from 2002-2004 and the Bradford Part III Intercollegiate Otolaryngology Revision Course FRCS ORL HNS from 2005 to 2009. I have organized regular registrar teaching courses in Leeds General Infirmary which is part of the registrar professional development programme in Yorkshire. I have established and developed a training course in Otolaryngology for General Practitioners (the Leeds General Infirmary Otoscopy Course 2007 to 2009). I was section editor of the ENT UK e-learning for health project. I have a masters of Education degree.

CONTINUING PROFESSIONAL DEVELOPMENT (selected courses only)

Paediatric and Adult Life Support Course, Leeds, January 2017

Touch Typing Course, Leeds General Infirmary (Bronze award) June 2010

RSM meetings in 2016/2017

Thorpe Park ENT GPwSI teaching 2016/2017

Cholesteatoma Conference June 2016, Session chair.

Surgical middle ear implantable hearing aid course. Germany May 2016

National selection interviews April 2016

Glasgow Endoscopic Middle Ear Surgery Course Oct 2015

RESEARCH

August - September 1988

Pathology research project with Dr GBM Lindop, Department of Pathology, Glasgow University, sponsored by the Scottish Home and Health Department. This was the first study to show the morphology of the mammalian peripolar cell. I became familiar with the use of both scanning and transmission electron microscopy techniques. The project was selected as Glasgow University's entry in the Cappell Award.

March 1997 - September 2001

Project investigating the chemical enhancement of facial nerve repair in the department of clinical neurosciences, the University of Edinburgh, under the supervision of Mr MA Glasby, reader in experimental neurology. This project involves the creation of an animal model for facial paralysis and repair using 'neurotrophic growth factors' in an effort to improve upon current outcome results.

September 2006 - September 2007

A prospective study 'A quantitative study on the differences in perceptions of training requirements between otolaryngology surgical trainers and trainees'. This work formed the basis of my 12000 word thesis in my Masters of Education degree at the University of Leeds. I passed

this in October 2007 (with merit). This work was presented to the North of England Otolaryngology Society Spring Meeting in March 2008.

AUDIT

I am involved in an audit of all my personal surgical cases since starting work as a consultant and several other departmental audit projects including encouraging junior grade doctors to carry out supervised audit.

COMPUTER SKILLS

I am conversant with most aspects of computer and information technology. I set up and maintained the North of England Otolaryngological Society web site (www.NoEENT.co.uk) until 2007 and my research and audit projects are kept on computer databases. I have set up a web based departmental handbook for the Leeds General Infirmary ENT department and a website for General Practice ENT courses. I migrated the ENT UK newsletter to a fully web based publication, personally undertaking all aspects of this project from sourcing articles to editorials and from the web design to uploading of the whole publication.

MANAGEMENT

I have attended a management training course and have been involved in the co-ordination of medical student teaching and the Edinburgh College fellowship examinations. I sat on the specialist advisory board in Otolaryngology, The Royal College of Surgeons of Edinburgh. I was, until recently a member of the specialist training committee of the Yorkshire Deanery for Otolaryngology. I was clinical director in ENT in The Leeds Teaching Hospitals NHS Trust from 2006 until 2009. I was appointed as a Trust Clinical Lead for Informatics in July 2007. I am a trust appraiser and undertake appraisal for my department and I am lead appraiser for the head and neck CSU. I managed the registrar placement in Leeds and authorized and policed leave arrangements for the registrar levels training grades.

I became deputy editor of the ENT-UK Newsletter in May 07 and editor in June 2008 I was appointed as editor. I carried out a significant part of editing this main source of medico-political information for ENT surgeons (junior and consultants) distributed to all members of our association. I transformed a drab and outdated newsletter into a modern and innovative publication. This required learning publication techniques and typesetting the entire production, transferring the final article to the publisher for printing only. I was a past council member of ENT UK.

I manage the acoustic neuroma service in Leeds, which has attracted more referrals year on year. I have started a system of virtual clinics. Patients with these benign brain tumours that have shown no growth of the tumour on an MR scan (and therefore the patient can be managed with a further scan and not surgery) can be spared a follow up appointment. I contact the patient by letter with this good news, arrange a further scan as needed and put the patient in touch with the clinical nurse specialist for advice if needed. This has reduced the wait for new patients to be seen.

MEDICO-LEGAL EXPERIENCE

I have extensive experience in medico-legal reports including major negligence cases. I have acted as an expert witness for the police and the coroner in cases of suspicious and unexplained deaths. I am a member of the Police Medical Appeals Board. I have answered many complaints for Leeds Teaching Hospitals NHS Trust and I am often asked for an opinion and written response in cases where I have had no contact with the patient in question, as I am seen as a able and willing to provide such a necessary service.

LOCAL AND NATIONAL PRESENTATIONS

BOOK REVIEWS

Stell and Maran's Head and Neck Surgery 4th Edition, Journal of the Royal College of Surgeons of Edinburgh (2001), **46** (2), 130.

CAREER PLANS

As a consultant surgeon in one of the largest hospital trust in Europe, I have a major surgical interest in neuro-otology and skull base surgery. I have helped set up a Neurofibromatosis Type II clinic, one of only a few in England, which has attracted national funding. I am advancing minimally invasive sinus surgery and frontal recess surgery by my leading on balloon sinuplasty in Yorkshire and I am one of few national ENT surgeons undertaking totally endoscopic middle ear and mastoid surgery. I have a commitment to teaching and clinical research and contribute to medical education, training and assessment in my college, the Royal College of Surgeons of Edinburgh and the University of Leeds. I have had a management role in clinical director of the Department of Otololaryngology in the Leeds Teaching Hospitals NHS Trust. I am actively involved in teaching and training, having demonstrated this in gaining my Masters of Education (Clinical Education) in 2007 when I carried out a research project in the perceptions of surgical training and I aim to pursue surgical training and medical education as a major part of my career. I am committed to be further involved in hospital management.
